PROFESSIONAL SUMMARY

Computer Science student specializing in full-stack development, Agentic AI, and cloud-native engineering. Experienced in building production-grade applications with the MERN stack, Python, and Java — with hands-on exposure to blockchain systems, data analytics pipelines, and DevOps practices including CI/CD and containerization. Driven by a systems-thinking mindset and a track record of shipping end-to-end solutions across web, data, and distributed platforms.

EDUCATION

KIT's College of Engineering

B.Tech in Computer Science and Engineering **CGPA: 8.9**

Kolhapur

Sep. 2023 – July 2026

Government Polytechnic Kolhapur

Diploma in Information Technology **Percentage: 93.18%**

Kolhapur

Dec. 2020 – Aug 2023

INTERNSHIP EXPERIENCE

Associate Technical Consultant

Streebo Inc, Ahmedabad, Gujarat

Jan 2026 – August 2026

- Contributing to the backend development of **AI Operator** — an agentic browser automation system that executes real-world tasks (e-commerce, bookings, form submissions) on behalf of users via conversational AI interfaces.
- Implementing new features and improvements for the AI Operator's sandboxed execution engine, enabling secure, isolated task execution triggered by chatbot interactions.

Software Development Intern

Mechsoft Digital Technologies Pvt. Ltd., Pune, Maharashtra

Jul 2025 – Dec 2025

- Contributing to the development of a **Library Management System** 🌐 with item listing, rental queues, and user notifications.
- Building both a mobile application for users and an admin panel using React to manage rentals and monitor platform activity.

PROJECTS

🔗 SkillForge AI | *LangGraph, LangChain, FastAPI, React, RAG, Groq LLaMA*

Jan 2026 – July 2026

- Built a full-stack AI-powered career platform that scrapes live job postings using Selenium and generates personalized week-by-week learning roadmaps specific to targeted company via LangGraph multi-agent RAG pipeline.
- Engineered a dual embedding strategy using Ollama and MongoDB Atlas Vector Search, enabling semantic job discovery and accurate skill-gap analysis from uploaded resumes.
- Implemented an AI Career Chat with multi-stage query routing, document grading, and adaptive retrieval — served via Groq LLaMA-3.3-70B with real-time web augmentation through Tavily Search.

🌐 Blockchain Based Voting System | *Ethereum, Hardhat, Web3.js, React, MetaMask*

Sept 2024 – May 2024

- Designed and developed a decentralized application (DApp) on the Ethereum blockchain with a React-based frontend for secure and transparent voting.
- Implemented and deployed secure smart contracts on the Ethereum network ensuring on-chain transparency, integrity, and MetaMask wallet integration for authenticated transactions.
- Utilized Web3.js to interact with Ethereum smart contracts, enabling blockchain transactions and real-time data retrieval.

🔗 DevSync | *MERN, Generative AI, Redis, WebSockets, WebContainers*

Jan 2025 – July 2025

- Developed a full-stack collaboration platform using the MERN stack, designed for developers to create projects, add collaborators, and communicate in real-time via chat rooms.
- Implemented real-time messaging with Socket.io, ensuring that only project collaborators can chat within dedicated project-based rooms.
- Integrated Google Generative AI (Gemini 1.5 Flash) for AI-driven chat assistance, generating project-specific code, structuring it into files, and enabling direct execution via WebContainers.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, TypeScript, Dart, HTML/CSS
Frameworks & Libraries: React.js, Node.js, Express.js, FastAPI
AI & Agentic Systems: LangChain, LangGraph, RAG Pipelines
Databases: MongoDB, MySQL, PostgreSQL
DevOps & Tools: Docker, Jenkins, Git, GitHub/GitLab, Linux
Blockchain: Ethereum, Solidity, Smart Contracts, Web3.js, Hardhat, MetaMask
Other: WebSockets, Redis, Selenium, REST APIs, Prisma ORM

EXTRACURRICULAR ACTIVITIES

Leetcode: Problems Solved: 500+, Profile: [Leetcode](#)
GeeksforGeeks: Problems Solved: 200+, College Rank: 10, Profile: [GeeksforGeeks](#)
GitHub: Profile: [GitHub](#)
Achievements:

- Winner at **KIT PBL Day, 2025** for the project: Stock Price Recommender
- 2nd Runner-up in the **KIT PBL DAY, 2024** for the project: Blockchain based Decentralized voting system
- Secured 2nd Runner-up position in the Coding Competition at **PIONEER 2025**, held at KIT

CERTIFICATES

Cloud Computing (NPTEL) – 12-week course, Jan–Apr 2025, Score: 75/100
AI/ML Virtual Internship (Google) – Completed via Kolhapur Institute of Technology
